### GENERAL

This Quarterly Report on Form 10-Q filed by Manitex International, Inc. speaks as of September 30, 2022 unless specifically noted otherwise. Unless otherwise indicated, Manitex International, Inc., together with its consolidated subsidiaries, is hereinafter referred to as “Manitex,” the “Registrant,” “us,” “we,” “our” or the “Company.”

### Forward-Looking Information

Certain information in this Quarterly Report includes forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995). These statements relate to, among other things, the Company’s expectations, beliefs, intentions, future strategies, future events or future financial performance, and involve known and unknown risks, uncertainties and other factors that may cause actual results, levels of activity, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. In addition, when included in this Quarterly Report or in documents incorporated herein by reference the words “may,” “expects,” “should,” “intends,” “anticipates,” “believes,” “plans,” “projects,” “estimates” and the negatives thereof and analogous or similar expressions are intended to identify forward-looking statements. However, the absence of these words does not mean that the statement is not forward-looking. We have based these forward-looking statements on current expectations and projections about future events. These statements are not guarantees of future performance. Such statements are inherently subject to a variety of risks and uncertainties that could cause actual results to differ materially from those reflected in such forward-looking statements. Such risks and uncertainties, many of which are beyond our control, include, without limitation, those described below and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021, in the section entitled “Item 1A. Risk Factors”:

- a future substantial deterioration in economic conditions, especially in the United States and Europe;
- the negative impacts COVID-19 has had and will continue to have on our business, financial condition, cash flows, results of operations and supply chain, as well as customer demand;
- the reliance of our customers on government spending, fluctuations in activity levels in the construction industry, and capital expenditures in the oil and gas industry;
- our level of indebtedness and our ability to meet financial covenants required by our debt agreements;
- our ability to negotiate extensions of our credit agreements and to obtain additional debt or equity financing when needed;
- any failure on our part to maintain an effective system of internal controls;
- the cyclical nature of the markets we operate in;
- further impact of increases in inflation and interest rates;
- our increasingly international operations expose us to additional risks and challenges associated with conducting business internationally, including currency exchange risks and risks related to the war in Ukraine, including various related global responses thereto;
- difficulties in implementing new systems, integrating acquired businesses, managing anticipated growth and responding to technological change;
- the availability of the third-party financing that some of our customers rely on to purchase our products;
- our operations are in a highly competitive industry and the Company is particularly subject to the risks of such competition;
- our dependency upon third-party suppliers makes us vulnerable to supply shortages;
- price increases in materials could reduce our profitability;
- the Company faces product liability claims and other liabilities due to the nature of its business;
- the Company’s success depends upon the continued protections of its trademarks and the Company may be forced to incur substantial costs to maintain, defend, protect and enforce its intellectual property rights;
- the volatility of our stock price;
- our ability to access the capital markets to raise funds and provide liquidity;

- a substantial portion of our revenues are attributed to a limited number of customers which may decrease or cease purchasing at any time;
- a disruption in or breach of our information technology systems;
- our reliance on the management and leadership skills of our senior executives;
- impairment in the carrying value of goodwill and/or other intangible assets could negatively affect our operating results;
- certain provisions of the Michigan Business Corporation Act and the Company's Articles of Incorporation, as amended, Amended and Restated Bylaws and the Rights Agreement related to the Company's Preferred Stock may discourage or prevent a change in control of the Company; and
- the cost of compliance with Section 404 of the Sarbanes-Oxley Act of 2002.

The risks described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2021 and in this Quarterly Report on Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or operating results. If any of these risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary significantly from what we projected. We do not undertake, and expressly disclaim, any obligation to update this forward-looking information, except as required under applicable law.

The Condensed Consolidated Balance Sheet as of December 31, 2021 was derived from our audited financial statements but does not include all disclosures required by accounting principles generally accepted in the United States ("GAAP").

## COVID-19 Pandemic

We are continuing to closely monitor the impact of the COVID-19 pandemic on all aspects of our business, including how it is impacting our customers, employees, supply chain, and distribution network, as well as the demand for our products in the industries and markets that we serve. Our first priority is the health and safety of our employees, customers and business partners, and we believe that we have taken the necessary steps to keep our facilities clean and safe during the COVID-19 pandemic. While COVID-19 has had a material impact on our past financial results, we are unable to predict the ultimate impact that it may have on our business, future results of operations, financial position or cash flows. The extent to which our operations may be impacted by the COVID-19 pandemic will depend largely on future developments, which are highly uncertain and cannot be accurately predicted, including new information that may emerge concerning the ultimate severity and duration of the pandemic (including the spread and impact of new COVID-19 variants) and actions by government authorities to contain the pandemic or treat its impact. Furthermore, the impacts of a potential worsening of global economic conditions and the continued disruptions to and volatility in the financial markets remain unknown.

The Company is continuing to experience supply chain disruptions and related logistical bottlenecks that have impacted our ability to meet strong industrial demand and have also increased costs related to shipping, warehousing and working capital management. While the Company is actively working to mitigate these expenses and the associated timing issues, certain segments – such as truck chassis – have been more impacted than others. Where appropriate and feasible, we have implemented pricing adjustments to protect margins and, in tandem, continue to build inventory to meet our customer requirements. In addition, the Company is actively managing costs and working to further streamline operations where needed. Furthermore, the Company has modified its business practices to manage expenses (including practices regarding employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences). We continue to take steps intended to minimize the negative impact of the COVID-19 pandemic on our business and to protect the safety of our employees and customers, but we cannot predict the duration or severity of the ongoing COVID-19 pandemic or reasonably estimate the financial impact that it will have on our results and significant estimates going forward.

## 2. Significant Accounting Policies

The summary of the Company's significant accounting policies is presented to assist in understanding the Company's consolidated financial statements. The financial statements and notes are representations of the Company's management who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

### Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all short-term securities purchased with maturity dates of three months or less to be cash equivalents. The cash in the Company's U.S. banks is not fully insured by the FDIC due to the statutory limit of \$250.

### Restricted Cash

Certain of the Company's lending arrangements require the Company to post collateral or maintain minimum cash balances in escrow. These cash amounts are reported as current assets on the balance sheets based on when the cash will be contractually released. Total restricted cash was \$188 and \$222 at September 30, 2022 and December 31, 2021, respectively.

### **Accounts Receivable and Allowance for Doubtful Accounts**

Trade accounts receivable are recorded at invoiced amount and do not bear interest. Allowance for doubtful accounts is the Company's estimate of current expected credit losses on its existing accounts receivable and determined based on historical customer assessments and current financial conditions. Account balances are charged off against the allowance when the Company determines the receivable will not be recovered. There can be no assurance that the Company's estimate of accounts receivable collection will be indicative of future results. The Company established an allowance for bad debt of \$1,690 and \$2,432 at September 30, 2022 and December 31, 2021. The Company also has, in some instances, a security interest in its accounts receivable until payment is received.

### **Property, Equipment and Depreciation**

Property and equipment are stated at cost or the fair market value at the date of acquisition for property and equipment acquired in connection with the acquisition of a company. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation of property, and equipment is calculated using the straight-line method over the estimated useful lives of the assets. Depreciation expense for the three and nine months ended September 30, 2022 was \$1,899 and \$4,388, respectively. Depreciation expense for the three and nine months ended September 30, 2021 was \$518 and \$1,614, respectively.

### **Accrued Warranties**

Warranty costs are accrued at the time revenue is recognized. The Company's products are typically sold with a warranty covering defects that arise during a fixed period of time. The specific warranty offered is a function of customer expectations and competitive forces.

A liability for estimated warranty claims is accrued at the time of sale. Such liability is established using historical warranty claim experience. The current provision may be adjusted to take into account unusual or non-recurring events in the past or anticipated changes in future warranty claims. Adjustments to the initial warranty accrual are recorded if actual claim experience indicates that adjustments are necessary.

As of September 30, 2022 and December 31, 2021, accrued warranties were \$1,784 and \$1,578, respectively.

### **Advertising**

Advertising costs are expensed as incurred and were \$133 and \$591 for the three and nine months ended September 30, 2022, respectively. Advertising costs were \$213 and \$487 for the three and nine months ended September 30, 2021, respectively.

### ***Business Combinations***

The Company accounts for acquisitions in accordance with guidance found in ASC 805, Business Combinations. The guidance requires consideration given, including contingent consideration, assets acquired and liabilities assumed to be valued at their fair market values at the acquisition date. The guidance further provides that: (1) acquisition costs will generally be expensed as incurred and (2) changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition date generally will affect income tax expense.

The Company records identifiable assets acquired and liabilities assumed at their estimated fair values as of the acquisition date. Goodwill is calculated as the excess of the aggregate of the fair value of the consideration transferred over the fair value of the net assets recognized.

### ***Noncontrolling Interest***

A noncontrolling interest is the equity interest of consolidated entities that is not owned by the Company. Noncontrolling interest is adjusted for the noncontrolling partners' share of earnings (losses) in accordance with the applicable agreement. Earnings allocated to such noncontrolling partners are recorded as income applicable to noncontrolling interest in the accompanying condensed consolidated statements of operations.

### ***Share-based Compensation***

The Company has elected to account for restricted stock awards with market conditions using a graded vesting method. This method recognizes the compensation cost in the statement of operations over the requisite service period for each separately-vesting tranche of awards.

### Adoption of Highly Inflationary Accounting in Argentina

GAAP guidance requires the use of highly inflationary accounting for countries whose cumulative three-year inflation exceeds 100 percent. Under highly inflationary accounting, PM Group's Argentina subsidiary's functional currency became the Euro (its parent company's reporting currency), and its income statement and balance sheet have been measured in Euros using both current and historical rates of exchange. The effect of changes in exchange rates on peso-denominated monetary assets and liabilities has been reflected in earnings in other (income) and expense, net and was not material. As of September 30, 2022, PM Group's Argentina subsidiary had an insignificant net peso monetary position. Net sales of PM Group's Argentina subsidiary were less than 5% of our consolidated net sales for the nine months ended September 30, 2022 and year ended December 31, 2021.

### 3. Revenue Recognition

## Customer Deposits

At times, the Company may require an upfront deposit related to its contracts. In instances where an upfront deposit has been received by the Company and the revenue recognition criteria have not yet been met, the Company records a contract liability in the form of a customer deposit, which is classified as a short-term liability on the Condensed Consolidated Balance Sheets. That customer deposit is revenue that is deferred until the revenue recognition criteria have been met, at which time, the customer deposit is recognized into revenue. Substantially all of the \$7.1 million customer deposit balance as of December 31, 2021 was recognized in revenues during 2022, and much of the \$3.4 million customer deposit balance as of September 30, 2022 is expected to be recognized in revenues during 2022.

The following table summarizes changes in customer deposits for the nine months ended September 30 as follows:

	September 30, 2022	September 30, 2021
Customer deposits	\$ 7,121	\$ 2,363

## 4. Fair Value Measurements

The following tables set forth the Company's financial assets and liabilities that were accounted for at fair value on a recurring basis as of September 30, 2022 and December 31, 2021 by level within the fair value hierarchy. As required by ASC 820-10, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

The following is summary of items that the Company measures at fair value on a recurring basis:

	Fair Value at September 30, 2022			
	Level 1	Level 2	Level 3	Total
<b>Liabilities:</b>				
Forward currency exchange contracts	\$ —	\$ 11	\$ —	\$ 11

Effect of changes in exchange rates	(5)
Balance at September 30, 2022	<u>\$ —</u>

### *Fair Value Measurements*

ASC 820-10 classifies the inputs used to measure fair value into the following hierarchy:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 — Quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability and

Level 3 — Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

The fair value of the forward currency contracts is determined on the last day of each reporting period using observable inputs, which are supplied to the Company by the foreign currency trading operation of its bank and are Level 2 items.

### **5. Derivative Financial Instruments**

The Company's risk management objective is to use the most efficient and effective methods available to us to minimize, eliminate, reduce or transfer the risks which are associated with fluctuation of exchange rates between the Euro, Chilean peso and the U.S. dollar.

#### *Forward Currency Contracts*

The Company enters into forward currency exchange contracts such that the exchange gains and losses on the assets and liabilities denominated in other than the reporting units' functional currency would be offset by the changes in the market value of the forward currency exchange contracts it holds. The forward currency exchange contracts that the Company has to offset existing assets and liabilities denominated in other than the reporting units' functional currency have been determined not to be considered a hedge under ASC 815-10. The Company records the forward currency exchange contracts at its market value with any associated gain or loss being recorded in current earnings. Both realized and unrealized gains and losses related to forward currency contracts are included in current earnings and are reflected in the Condensed Consolidated Statements of Operations in the other income (expense) section on the line titled foreign currency transaction gain (loss). Items denominated in other than a reporting unit functional currency include certain intercompany receivables due from the Company's Italian subsidiaries and accounts receivable and accounts payable of our Italian subsidiaries and their subsidiaries.

PM Group has an intercompany receivable denominated in Euros from its Chilean subsidiary. At September 30, 2022, the Company had entered into a forward currency exchange contract that matured on October 28, 2022. Under the contract the Company was obligated to sell 2,200,000 Chilean pesos for 2,296 Euros. The purpose of the forward contract was to mitigate the income effect related to this intercompany receivable that results with a change in exchange rate between the Euro and the Chilean peso.

The following table provides the location and fair value amounts of derivative instruments that are reported in the Condensed Consolidated Balance Sheet as of September 30, 2022:

#### **Total derivatives NOT designated as a hedge instrument**

		Fair Value	
		September 30, 2022	December 31, 2021
<b>Asset Derivatives</b>

During the three and nine months ended September 30, 2022 and 2021, there were no forward currency contracts designated as cash flow hedges. As such, all gains and loss related to forward currency contracts during the three and nine months ended September 30, 2022 and 2021 were recorded in current earnings and did not impact other comprehensive income.

The liability is established using historical warranty claim experience. The current provision may be adjusted to take into account unusual or non-recurring events in the past or anticipated changes in future warranty claims. Adjustments to the warranty accrual are recorded if actual claim experience indicates that adjustments are necessary. Warranty reserves are reviewed to ensure critical assumptions are updated for known events that may impact the potential warranty liability.

### U.S. Credit Facilities and Term Loan

On April 11, 2022, the Company entered into a Commercial Credit Agreement (the “Credit Agreement”), by and among the Company, the Company’s domestic subsidiaries and Amarillo National Bank. The Credit Agreement provides for a \$40,000 revolving credit facility that matures on April 11, 2024, a \$30,000 revolving credit facility that matures on April 11, 2024 and a \$15,000 term loan that matures on October 11, 2029. Borrowings under the revolving credit facilities and the term loan bear interest at a floating rate equal to the Prime Rate plus 0.5%. The revolving credit facilities require monthly interest payments with the full principal balance coming due at maturity, and the \$30,000 revolving credit facility requires quarterly payments in the amount of 3% of the outstanding balance thereunder on a quarterly basis beginning on January 1, 2023. The term loan requires monthly interest payments with quarterly amortization payments beginning on November 11, 2022, with the remaining principal balance coming due at maturity. The unused balance of the revolving credit facilities incurs a 0.125% fee that is payable semi-annually. At September 30, 2022, the Company had \$53.2 million in borrowings (less than \$0.1 million in debt issuance cost for a net debt of \$53.2 million) under the revolving credit facilities. At September 30, 2022, the Company had \$15.0 million in borrowings (less \$0.1 million in debt issuance cost for a net debt of \$14.9 million) under the term loan.

The Credit Agreement requires the Company to maintain a debt service coverage ratio of at least 1.25:1.00 measured on the last day of each calendar quarter, beginning June 30, 2022, and each measurement is based on a rolling 12-month basis. The Credit Agreement also requires the Company to maintain a U.S. net worth of at least \$80,000, measured as of the last day of each calendar quarter, beginning June 30, 2022. The Company was in compliance with its covenants under the Credit Agreement as of September 30, 2022.

The Company and its U.S. subsidiaries were parties to a Loan and Security Agreement, as amended (the “Loan Agreement”) with CIBC Bank USA (“CIBC”). The Loan Agreement provided a revolving credit facility with a maturity date of July 20, 2023 in an aggregate amount of \$30 million. At December 31, 2021, the Company had \$12.8 million in borrowings (less \$0.1 million in debt issuance cost for a net debt of \$12.7 million). The indebtedness under the Loan Agreement was collateralized by substantially all of the Company’s assets, except for certain assets of the Company’s subsidiaries. On April 11, 2022, the Company repaid in full all outstanding indebtedness and other amounts outstanding of approximately \$12.8 million and terminated all commitments and obligations under the Loan Agreement with CIBC in satisfaction of all of the Company’s debt obligations under the Loan Agreement. The Company was not required to pay any pre-payment premiums as a result of the repayment of indebtedness under the Loan Agreement. In connection with the repayment of such outstanding indebtedness by the Company, all security interests, mortgages, liens and encumbrances granted to the lenders under the Loan Agreement were terminated and released.

## **11. Leases**

The Company leases certain warehouses, office space, machinery, vehicles and equipment. Leases with an initial term of 12 months or shorter are not recorded on the balance sheet; the Company recognizes lease expense for these leases on a straight-line basis over the applicable lease term.

The Company is not aware of any variable lease payments, residual value guarantees, covenants or restrictions imposed by the leases. Most leases include one or more options to renew, with renewal terms that can extend the lease term. The exercise of these lease renewal options is at the Company's sole discretion. The depreciable life of assets is limited by the expected lease term for finance leases.

If there was a discount rate explicit in the lease, then such discount rate was used. For those leases with no explicit or implicit interest rate, an incremental borrowing rate was used. The weighted average remaining useful life for operating and finance leases were 4.2 and 5 years, respectively. The weighted average discount rate for operating and finance leases was 5.2% and 12.4% respectively.

We had no consolidated VIEs as of September 30, 2022 and December 31, 2021.

In connection with our acquisition of Rabern, the Company became the lessee of two buildings from HTS Management LLC (“HTS”), an entity controlled by Steven Berner, who is a key member of Rabern management. HTS operates as a holding company for property and as a single lessee leasing company for business use property for Rabern. HTS’s ongoing activities preceding and succeeding the Rabern acquisition relate to financing, purchasing, leasing and holding property leased to Rabern. Based on these activities, HTS would be subject to interest rate risk and real estate investment pricing risk related to holding the real estate as an investment. These risks represent the potential variability to be considered as passed to interest holders. Although we have a variable interest through our relationship with Mr. Berner, such variability is not passed on to Rabern in connection with the arrangement, and therefore Rabern is not the primary beneficiary of the VIE. Furthermore, all risks and benefits of the significant activities of HTS are passed to Mr. Berner directly and do not represent a direct or indirect obligation for Rabern.

The effective tax rate for the three months ended September 30, 2022 differs from the U.S. statutory rate of 21% primarily due to a valuation allowance in the U.S., a reduction in the valuation allowance recorded against state tax credits in connection with the Rabern acquisition, a partial valuation allowance in Italy, nondeductible foreign permanent differences, income taxed in foreign jurisdictions at varying tax rates and a reduction in the uncertain tax position liability related to the expiration of the statutes of limitations for a foreign jurisdictions.

Additional compensation expense related to restricted stock units will be \$228, \$769 and \$509 for the remainder of 2022, 2023 and 2024, respectively.

### *Restricted Stock Award with Market Conditions*

On May 3, 2022, in connection with J. Michael Coffey's appointment as the Company's Chief Executive Officer as of April 11, 2022, he was granted 490,000 restricted stock units that vest upon attainment of certain stock price hurdles of the Company's stock. The restricted stock units can only be received on an annual basis from the vesting start date. The fair value of the market conditions award was \$2.2 million calculated by using the Monte Carlo Simulation based on the average of 20,000 simulation runs. The requisite service period used was three years, expected volatility was 60% and the risk-free rate of return was 2.94%. The value of the restricted stock units granted to Mr. Coffey is being charged to compensation expense over the requisite service period. Under ASC 718-10-35-2, compensation cost for the award of share-based compensation is recognized over the derived service periods (the time from the service inception date to the expected date of satisfaction) of either 12 or 24 months depending on the particular tranche based on the median number of days it takes for the award to vest in scenarios where they meet their threshold. Compensation expense related to restricted stock units was \$386 and \$566 for the three and nine months ended September 30, 2022, respectively. Additional compensation expense related to Mr. Coffey's restricted stock units will be \$340, \$990 and \$269 for the remainder of 2022, 2023 and 2024, respectively.

### *Restricted Stock Award with Market and Performance Conditions*

On May 3, 2022, in connection with his appointment, Mr. Coffey was also granted 100,000 restricted stock units that vest upon a change in control in which the per share consideration for the Company's common stock exceeds \$10.00. The fair value of the market and performance conditions award was \$481, calculated by using the Black-Scholes Option Pricing Model. The requisite service period used for the calculation was three years, expected volatility was 60% and the risk-free rate of return was 2.95%. The fair value of stock-based compensation for market and performance conditions will be recognized in the Company's financial statements only if it is probable that the conditions will be satisfied.

### *Stock Options*

On May 3, 2022, in connection with his appointment, Mr. Coffey was also granted 100,000 stock options with an exercise price of \$4.13 per share. The options vest ratably on each of the first three anniversary dates of Mr. Coffey's appointment date, subject to his continued service with the Company on each vesting date. ## **15. Legal Proceedings and Other Contingencies**

The Company is involved in various legal proceedings, including product liability, employment related issues, and workers' compensation matters that have arisen in the normal course of operations. The Company has product liability insurance with self-insurance retentions that range from \$50 to \$500.

When it is probable that a loss has been incurred and it is possible to make a reasonable estimate of the Company's liability with respect to such matters, a provision is recorded for the amount of such estimate that is most likely to occur. Certain legal proceedings are at a preliminary stage, and it is not possible to estimate the amount or timing of any cost, if any, to the Company for these cases. However, the Company does not believe that these contingencies, in the aggregate, will have a material adverse effect on the Company.

The Company has been named as a defendant in several multi-defendant asbestos-related product liability lawsuits. In certain instances, the Company is indemnified by a former owner of the product line involved. In the remaining cases the plaintiff has, to date, not been able to establish any exposure by the plaintiff to the Company's products. The Company is uninsured with respect to these claims but believes that it will not incur any material liability with respect to these claims.

On May 5, 2011, Company entered into two separate settlement agreements with two plaintiffs. As of September 30, 2022, the Company has a remaining obligation under these agreements to pay the plaintiffs \$855 without interest in 9 annual installments of \$95 on or before May 22 of each year. The Company has recorded a liability for the net present value of the liability. The difference between the net present value and the total payment will be charged to interest expense over the payment period.

It is reasonably possible that the estimated reserve for product liability claims may change within the next 12 months. A change in estimate could occur if a case is settled for more or less than anticipated, or if additional information becomes known to the Company.

Based on these activities, HTS would be subject to interest rate risk and real estate investment pricing risk related to holding the real estate as an investment. These risks represent the potential variability to be considered as passed to interest holders. Although we have a variable interest through our relationship with Mr. Berner, such variability is not passed on to Rabern in connection with the arrangement, and therefore Rabern is not the primary beneficiary of the VIE. Rabern is a construction equipment rental provider established in 1984 and primarily serves Northern Texas. The president and founder of Rabern, Steven Berner, retained a 30% ownership interest and continues to run the operation as a stand-alone division of the Company. The purchase price is subject to adjustments based on the final calculation of working capital and the net book value of the rental fleet as of the date of the acquisition. The Company financed the acquisition by borrowings on the Company's line of credit and a term loan.

The acquisition of Rabern was accounted for as a business combination in accordance with Accounting Standards Codification ASC 805, Business Combinations, which requires allocation of the purchase price to the estimated fair values of assets acquired and liabilities assumed in the transaction. The preliminary fair value of the consideration transferred at the acquisition date was \$41.3 million. Given the timing of the closing of the acquisition and the time necessary to complete the allocation of the purchase price to the identified assets, the initial accounting for the business combination was not finalized at the time the third quarter 2022 financial statements were issued. Adjustments to the valuation of Rabern's assets and liabilities may be materially different due to possible changes as the purchase price allocation is completed.

The financial results of Rabern beginning on April 11, 2022 are included in the Company's condensed consolidated financial statements and are reported in the Rental Equipment segment for the periods ended September 30, 2022. The amount of revenue and income from operations associated with the Rabern acquisition from the acquisition date to September 30, 2022 are included in the Company's condensed consolidated financial statements for the periods ended September 30, 2022.

The following table summarizes the purchase price allocations for the Rabern acquisition as of September 30, 2022:

Total purchase consideration:	
Consideration	\$ 26,737
Revolving loan payoff	14,604
Net purchase consideration	<u>41,341</u>
Allocation of consideration to assets acquired and liabilities assumed:	
Cash	2,975
Net working capital	3,723
Other current assets	419
Fixed assets	27,658
Customer relationships	4,500
Trade name and trademarks	1,200
Goodwill	13,252
Deferred tax liability	(2,496)
Other current liabilities	(926)
Total fair value of assets acquired	<u>50,305</u>
Less: noncontrolling interests, net of taxes	8,964
Net assets acquired	<u>\$ 41,341</u>

The fair value of identifiable intangible assets is determined primarily using the relief from royalty approach and multi-period excess earnings method for trademarks and customer relationships, respectively. Fixed asset values were estimated using either the cost or market approach. Goodwill represents the amount by which the purchase price exceeds the estimated fair value of the net assets acquired. The Rabern acquisition was structured as a taxable purchase of 70% of a partnership interest whereby Manitex and Mr. Berner subsequently contributed their respective membership interest in Rabern to a newly formed Delaware corporation. The partnership will

make an IRC Section 754 Election which will give Manitex Section 743(b) step-up in the tax basis in the partnership assets for its acquired membership interest.

The following table summarizes, on an unaudited pro forma basis, the combined results of operations of Rabern as though the acquisition had occurred as of January 1, 2021. The pro forma amounts presented are not necessarily indicative of either the actual consolidated results had the acquisition occurred as of January 1, 2021 or of future consolidated operating results.

Net revenues increased \$14.1 million or 27.7% to \$65.0 million for the three months ended September 30, 2022 from \$50.9 million for the comparable period in 2021. The increase in revenues is primarily due to the acquisition of Rabern and increases in sales of straight mast cranes by the Company's U.S. subsidiaries. Increases in sales of PM Cranes were offset by foreign currency changes of \$4.6 million.

Our gross profit increased \$4.3 million to \$12.3 million for the three months ended September 30, 2022 from \$8.0 million for the comparable period in 2021. The increase in gross profit is attributable to increases in revenues due to the Rabern acquisition and increases in sales of straight mast cranes partially offset by higher material costs. The increase in gross profit percentage is primarily driven by the Rabern acquisition and price surcharges on Manitex Cranes offset by material cost inflation due to disruptions in the supply chain.

**Foreign currency transaction losses** — For the three months ended September 30, 2022, the Company had foreign currency gain of \$0.2 million compared to a loss of \$0.1 million for the comparable period in 2021. A substantial portion of the gain relate to changes in the Chilean peso.

**Other income (expense)** — Other expense was \$2.9 million for the three months ended September 30, 2022 driven by the proposed settlement with Custom Truck One Source, L.P. in connection with the sale of our Load King business in 2015 compared to other expense of \$0.1 million for the comparable period in 2021.

## Liquidity and Capital Resources

The ultimate duration and severity of the COVID-19 pandemic remains highly uncertain at this time. Accordingly, its impact on the global economy generally and our customers and suppliers specifically, as well as the potential negative financial impact to our results of operations and liquidity position cannot be reasonably estimated at this time, but could be material. In the context of these uncertain conditions, we are actively managing the business to maintain cash flow and ensure that we have sufficient liquidity for a variety of scenarios. We believe that such strategy will allow us to meet our anticipated funding requirements.

On April 11, 2022, the Company entered into an \$85 million credit facility with Amarillo National Bank consisting of a working capital facility of \$40 million, working capital facility of \$30 million, and \$15 million term loan facility. This new banking facility provided the funds for the Rabern acquisition and working capital facilities for both the Manitex and Rabern businesses. At September 30, 2022, the PM Group had established working capital facilities with five Italian, one Spanish, twelve South American banks and one Romanian bank, which was added in August 2022. Under these facilities, the PM Group can borrow \$19.2 million against orders, invoices and letters of credit.

Cash, cash equivalents and restricted cash were \$11.9 million and \$21.6 million at September 30, 2022 and December 31, 2021. At September 30, 2022, the Company had global liquidity of approximately \$32 million based on the cash balance and availability under its working capital facilities. Future advances are dependent on having available collateral.

If our revenues were to increase significantly in the future, the provision limiting borrowing against accounts receivable and inventory would limit future borrowings. If this were to occur, we would attempt to negotiate higher inventory caps with our banks. There is, however, no assurance that the banks would agree to increase the caps.

The Company expects cash flows from operations and existing availability under the current revolving credit and working capital facilities will be adequate to fund future operations. If, in the future, we were to determine that additional funding is necessary, we believe that it would be available. There is, however, no assurance that such financing will be available or, if available, on acceptable terms.

At September 30, 2022 and December 31, 2021, no customer accounted for 10% or more of the Company's accounts receivable.

#### **Cash flows for the nine-month period ended September 30, 2022 compared to the nine-month period ended September 30, 2021**

**Operating Activities** - For the nine months ended September 30, 2022, cash flow used in operating activities was \$11.3 million compared to cash provided by operating activities of \$4.3 million for the same period in the prior year. Cash used by working capital was \$13.0 million for the nine months ended September 30, 2022 compared to cash provided by working capital of \$0.4 million for the same period in the prior year. The increase is primarily related to inventory to meet increasing demand and backlog.

**Investing Activities** - Cash used in investing activities was \$50.2 million in the first nine months of 2022, compared to \$0.7 million used in investing activities in the same period a year ago. Cash used in the nine month period ended September 30, 2022 was primarily related to cash payments for the Rabern acquisition of \$38.4 million, property and equipment purchases of \$13.7 million, offset by \$1.9 million in proceeds from the sale of the Badger facility and other equipment. Cash used in the nine month period ended September 30, 2021 was related to cash payments for property and equipment and investment in intangible assets.

**Financing Activities** - Cash provided by financing activities was an inflow of \$55.5 million for the nine months ended September 30, 2022 which included an increase in borrowings on the revolving credit facility in connection with the Rabern acquisition of \$46.7 million, borrowings on the term loan in connection with the Rabern acquisition of \$15.0 million, additional borrowings on the revolving credit facility of \$6.7 million, working capital borrowing of \$0.9 million and borrowings for insurance agreements and finance leases of \$0.9 million, offset by repayment of previous revolving credit facility of \$12.8 million and notes of \$1.1 million. Cash used in financing activities was an outflow of \$1.9 million for the nine months ended September 30, 2021 which included a decrease in working capital borrowing of \$1.3 million, repayments of notes of \$1.1 million and payments on capital lease obligations of \$0.3 million, offset by borrowings for insurance agreements of \$0.7 million.

#### **Critical Accounting Policies**

The Company's critical accounting policies have not materially changed since the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2021 was filed. ### **Item 3—Quantitative and Qualitative Disclosures about Market Risk**

Not required for Smaller Reporting Companies.

### **Item 4—Controls and Procedures**

#### *Disclosure Controls and Procedures*

With the participation of our Chief Executive Officer (principal executive officer) and Chief Financial Officer (principal financial officer) and under the supervision of the Audit Committee of the Board of Directors, our management conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act, as of September 30, 2022. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures, as of September 30, 2022, were effective and provided reasonable assurance that the information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

#### *Changes in Internal Control Over Financial Reporting*

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). During the period covered by this report, the Company made no changes that have materially affected, or that are reasonably likely to materially affect, its internal control over financial reporting.

## **PART II—OTHER INFORMATION**

### **Item 1—Legal Proceedings**

The information set forth in Note 15 (Legal Proceedings and Other Contingencies) to the accompanying Condensed Consolidated Financial Statements included in Part I. Item 1 “Financial Statements” of this Quarterly Report on Form 10-Q is incorporated herein by reference.

### **Item 1A—Risk Factors**

Except as set forth below, as of the date of this filing, there have been no material changes from the risk factors disclosed in the Company’s Annual Report on Form 10-K filed for the fiscal year ended December 31, 2021.

#### ***Our increasingly international operations expose us to additional risks and challenges associated with conducting business internationally.***

The international expansion of our business may expose us to risks inherent in conducting foreign operations. These risks include:

- challenges associated with managing geographically diverse operations, which require an effective organizational structure and appropriate business processes, procedures and controls;
- the increased cost of doing business in foreign jurisdictions, including compliance with international and U.S. laws and regulations that apply to our international operations;
- currency exchange and interest rate fluctuations and the resulting effect on our revenue and expenses, and the cost and risk of entering into hedging transactions, if we continue to do so in the future;
- cash requirements to finance business growth;
- potentially adverse tax consequences;
- complexities and difficulties in obtaining protection and enforcing our intellectual property;
- compliance with additional regulations and government authorities in a highly regulated business;
- general economic and political conditions internationally, including the ongoing war between Russia and Ukraine; and
- public health concerns, including the ongoing COVID-19 pandemic.

Additionally, changes to the United States’ participation in, withdrawal from, renegotiation of certain international trade agreements or other major trade related issues including the non-renewal of expiring favorable tariffs granted to developing countries, tariff quotas and retaliatory tariffs, trade sanctions, new or onerous trade restrictions, embargoes and other stringent government controls could have a material adverse effect on our business, results of operations and financial condition.

The reporting currency for our consolidated financial statements is the U.S. Dollar. Certain of our assets, liabilities, expenses, revenues and earnings are denominated in other countries’ currencies, including the Euro, Chilean Peso and Argentinean Peso. Those assets, liabilities, expenses, revenues and earnings are translated into U.S. Dollars at the applicable exchange rates to prepare our consolidated financial statements. Therefore, increases or decreases in exchange rates between the U.S. Dollar and those other currencies affect the value of those items as reflected in our consolidated financial statements, even if their value remains unchanged in their original currency.

In connection with the ongoing war between Russia and Ukraine, the U.S. government has imposed enhanced export controls on certain products and sanctions on certain industry sectors and parties in Russia. The Company is not accepting orders from Russia at this time. This region does not represent a material portion of our international operations, and we do not rely on any material goods from suppliers in the region. However, the fluidity and continuation of the conflict may result in additional economic sanctions and other impacts which could have a negative impact on the Company’s financial condition, results of operations and cash flows. These include decreased sales; supply chain and logistics disruptions; volatility in foreign exchange rates and interest rates; inflationary pressures on raw materials and energy and heightened cybersecurity threats.

The risks that the Company faces in its international operations may continue to intensify if the Company further develops and expands its international operations.

**Item 2—Unregistered Sales of Equity Securities and Use of Proceeds.**

The Company's Credit Agreement with Amarillo National Bank directly restricts the Company's ability to declare or pay dividends without Amarillo's consent. In addition, pursuant to the Company's Credit Agreement with Amarillo National Bank, the Company's U.S. subsidiaries must maintain a debt service coverage ratio of at least 1.25:1.00 and a net worth for U.S. entities of at least \$80 million, each as measured on the last date of each calendar quarter, beginning June 30, 2022.
